LABORATORY/PROJECT ATTIRE

BROWN
Division of Pre-College
and Undergraduate Programs

Since part of your course or program will take place in a laboratory and/or involve project-based work, Brown's Department of Environmental Health and Safety has developed a dress code aimed at protecting the safety and well-being of the campus community. Please be prepared to adhere to the dress code during your lab/project work. If you do not adhere to this requirement, you will be sent back to your room to change and you will miss valuable instructional time. Please be prepared with lab/project attire every day (unless otherwise specified by your instructor) and expect to wear lab/project attire for your first class session.

Acceptable lab/project attire:

Closed-toe shoes or sneakers, long pants (preferably jeans or similar sturdy fabric), short- or long-sleeve shirts or tops. **Students with long hair should be prepared to tie their hair back for the duration of the class period.*

Unacceptable lab/project attire:

Open-toe shoes (sandals, flip-flops), shorts, skirts, or tank tops.

Safety Attire:

Students may be provided Personal Protective Equipment (PPE) such as safety glasses or gloves, etc. If PPE is provided students are responsible for wearing it at all times while engaged in lab or project-based work.
